

## **BIMXchange v4.0 Frequently Asked Questions (FAQs)**

**Will BIMXchange Content Management Solution work in the Revit 2009 or 2010 platform?**

- ▶ No, the BIMXchange v4.0 will only work with Revit 2011 or newer products. Version 3.2 is still compatible with the Revit 2010 platform.

**Does BIMXchange v4.0 work in Vista and Windows 7?**

- ▶ Yes it does. Though Windows XP is not supported.

**Can a user uninstall the BIMXchange v4.0 application?**

- ▶ Yes, the application can be uninstalled through the Windows Control Panel.

**Does the BIMXchange v4.0 link in Revit's Add-Ins Tab use computer resources when not used?**

- ▶ No, the BIMXchange CMS does not affect Revit performance when not in use. The CADworks link only loads the CMS when necessary.

**During installation, the program installation buttons stop working with no option of going further. What is wrong?**

- ▶ Most often, when unable to get past a certain step in the installation process there is an Alert window behind the visible window. Move the current window and respond to the popup message.
